About Climate Solutions:

Climate Solutions' mission is to accelerate practical and profitable solutions to global warming by galvanizing leadership, growing investment and bridging divides in the Pacific Northwest. Since our founding in 1998, Climate Solutions has emerged as one of the most effective, accomplished climate groups in the nation. We have led highly successful climate and clean energy initiatives in the Northwest states of Washington, Oregon, Idaho and Montana, while supporting and building the base for strong national action. We've built coalitions across cities and farms, business and labor, and environmentalists and social justice advocates, for innovative solutions to global warming. We mobilize different voices to support a healthy clean energy future – with a stronger economy, improved air quality, better transportation choices, energy efficiency, and job creation. For more information about Climate Solutions, visit www.climatesolutions.org.
