

If Not Now, WHEN?

As your constituent, I am writing to ask you to help pass comprehensive climate and energy legislation that caps global warming pollution and leads our country to clean American power.

The Gulf Coast oil catastrophe is the epitome of what's wrong with our national energy policy and a clarion call for taking action now to cut our oil dependence.

America needs a new energy policy that will cut our oil dependence, reduce carbon pollution, and lead us to clean American energy.

I'm counting on you this year to support comprehensive climate and energy legislation and to use your leadership in the Senate to help pass it.

Sincerely,

Signature
